NOTES:

1. This unit is available with an internal TCXO (±0.5 PPM) - Model No. SLSM5-612-INT
2. The frequency adjustment is only applicable on units with internal reference.
3. The 'REF IN' connector is not provided on units with internal reference.
4. This synthesizer employs a fractional ÷N architecture. With an external input the output frequency has the same stability as the input and is typically accurate to within 2 Hz.
5. There is a very small set of frequencies at which a spectral anomaly occurs where the close in spurious are <-60 dBc. These can often be eliminated by shifting Fo by 1 or 2 kHz.
6. These units have a non-volatile memory feature and at power on the unit will return to the last set frequency.
7. Proper heatsinking is required to keep surface temperature less than +65°C.
8. For TTL compatible lock detector output, add -T at the end of the model number.
